

AQUAFACIAL AKA HYDRODERMABRASION

AquaFacial

Hydrodermabrasion is the latest innovation currently trending in the major skincare industry. This technology combines water based serums and oxygen to effortlessly exfoliate and reveal a healthier, more radiant texture. Our Signature AquaFacial an invigorating treatment that delivers long-term skin health and can be tailored to meet the specific needs of all skin types. It offers instant, noticeable results with no downtime or irritation. The AquaFacial treatment removes dead skin cells and extracts impurities while simultaneously bathing the new skin with antioxidants, vitamins and peptides. The treatment is soothing, refreshing, non-irritating and immediately effective. Hydrodermabrasion can be performed on all skin types, including those with aging, blemished, dull, dehydrated, and discolored skin.

Microcurrent

Microcurrent uses low-voltage electricity to stimulate muscle, adenosine triphosphate (ATP) cell growth, and collagen development in the dermis. Improve Facial contour, promote blood circulation and improves lymphatic drainage

Bipolar RF --Non-invasive face-lift

RF therapy uses low energy to heat the deep layer of the skin called the dermis. This heat stimulates the production of collagen to help improve signs aging. RF therapy is safe and can be effectively used in treating mild or moderate signs of aging.

Suction and extraction

Deep cleansing to help loosen the deeper dirt, dead skin and sebum from the pores, vacuum adsorption, fundamentally clean without damaging the skin. This is so important since sebum accumulation is the cause of blackheads and whiteheads, the precursors of acne.

Oxygen Infusion

Oxygen infusion is the great note of hydropeel therapy. It is a nourishing treatment that is designed to strengthen, rejuvenate, and radically improve the overall texture of the skin. The properties of the serums infused with the oxygen molecules reach deeper into the layers of the skin, increasing absorption, stimulating collagen production, and offering rapid recovery after skin procedures. As a result, the skin is instantaneously resilient and glowing, making your skin look younger, healthier, brighter, and fresher.

BOOSTER SERUMS can be added to customize your treatment and address specific skin concerns.

Nano Infusion Mesotherapy

Nano Infusion Mesotherapy is non-invasive delivery system that insures absorption of nutrients. It has built-in pump to dispense the serum and circular bipolar microcurrent that promotes absorption of any formula by breaking down molecules into smaller fragments that are of suitable size for absorption across cell membranes

Cryotherapy (cold application)

An essential tool to finish AquaFacial. By shrinking the pores and exercising capillaries of the dermis.

THE RESULTS

It is our promise to you that AquaFacial will not only improve the look of your skin, but with frequent treatments, will restore skin health.

It is our belief beautiful skin instills a deep confidence that amplifies inner beauty. It is our mission to reveal the best skin of your life.
